

Why

WHOSE REALITY ? WHOSE ? ? CHOICE ?

Enough of the distortions of asphyxiating
DEATH cultures based on museums ,
old tribalisms, past rulers and the fruits
of exploitation. Nor do we need suffer the

SLAVERY WHICH WE'RE FORCE FED —

remain content with a freedom which
consists of nothing more than being
allowed to decide in which way we dull
ourselves to the pain of daily survival ?

Whether to be knocked out by sport or booze ,
sex, drugs, religion; or the distractions of telly, cars,
videos, houses, kids, gardens and so on.

Is there anyone who cannot see the carrot + stick choice
between work and the dole for what it is:
a sick + threadbare joke?

Which misery is more bearable than the other?
Who really wants to endure EITHER the boredom
regimentation/ submission/ humiliation and futility of
alienated labour OR the deadening monotony of enforced
poverty + idleness

IN RETURN FOR PALTRY COMFORT + (IN) SECURITY

The unemployed driven into criminality or subsistence
living, haunted by the presence of SS. spies or the
threat of starvation.
Forced to prostitute any skill or attribute in an
attempt to survive, with the state, in isolation.

The worker to be whipped with the uncertainty of employment
due to "economics" into a compliant yes-dom.
Hence steelworkers are scared into working against the miners,
BY THEIR UNION AND THE BOSSES, with the threat of plan
damage and closures if they so much as blink out of turn.

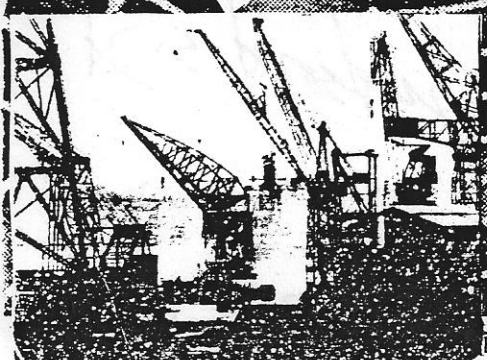

Also, thanks to the "normal" "reasonable" SCABS,
who are so cowed that they see their exploitation
as natural and good, the full force of the State is
mobilised against all who know this BULLSHIT for
what it is . In order to guarantee our right to
submit to this "work" of their's; to ensure that we
remain free to endure our chosen exploitation they
SMASH our skulls and bodies from upon their
rotten throne of law and order.

Whose community is threatened by mob rule?
Surely not that of the exploited!!
With whole cities and towns reduced to decaying
shadows of themselves.

Entire inner city "communities" SMASHED and uprooted
in the cause of progress and speculative re-development.
The concerted destruction, during the last 30 years, of
hundreds of workplaces, which
had strong shop floor "communities", thru
modernisation, nationalisation, re-location, rationalising
of industries or CLOSURES.
Untold communities have been destroyed
during the history of development of
commodity capitalism and they dare to expect
